**RE: Revise Final Draft Feasibility Study and Technical Memorandum No.3, C&D
Recycling Site, Foster Township, Luzerne County, Pennsylvania (Internal Review)**

Dear Joe:

Enclosed are two copies of the revised FS and draft Technical Memorandum No. 3 referenced above. These two documents address the USEPA comments contained in the October 25, 1991 letter. The revisions to the FS have been highlighted to facilitate review. This package contains the revisions to all portions of the FS except for section 3.0, Identification and Screening of Remedial Action Technologies. The only change to this section involves additional descriptions of some extraction technologies. This additional text (approximately 8 to 10 pages) was not ready for delivery and therefore, will be faxed later this afternoon.

Please review these documents and provide comments so that final versions can be prepared for delivery to USEPA by January 10, 1992.

Sincerely,

John Iannone, P.E.
Project Engineer

James A. Perazzo
Project Coordinator
